

Pfizer Expanded Access Protocols

(Updated: May 29, 2019)

An Expanded Access Protocol (EAP) is designed to provide access to multiple eligible patients to an investigational drug under compassionate access. Here is a list of the currently active EAPs for Pfizer investigational drugs (as of May 29, 2019):

Investigational Drug Name	Related Names or Numbers	Expanded Access Protocol Title	ClinicalTrials.gov Identifier:
Lorlatinib	PF-06463922	Lorlatinib – PF-06463922	NCT03127618 <i>(click for more information)</i>
Inotuzumab	Inotuzumab Ozogamicin PF-05208773	Inotuzumab Ozogamicin – PF-05208773	NCT03127605 <i>(click for more information)</i>
Xalkori	Crizotinib	Crizotinib (Xalkori) Expanded Access Protocol for The Treatment Of Adult Or Pediatric Patients	NCT02473497 <i>(click for more information)</i>

Patient eligibility will be determined by Pfizer in accordance with the [Pfizer Policy](#) and patient eligibility criteria identified in the protocol corresponding to the specific investigational drug. For more information about compassionate access visit, www.pfizer.com/compassionateaccess. Questions directed to specific investigational drugs may be submitted to the Pfizer [Compassionate Access Request System](#) where a trusted Pfizer employee will respond to your question.

For U.S. Health Care Providers:

- Information on Pfizer clinical trials can be found on Pfizer's [Find A Trial](#) website or by calling Pfizer's ClinicalTrials.gov Call Center at 1-800-718-1021. Information for all available clinical trials can be found at the ClinicalTrials.gov website.
- Detailed information and patient eligibility criteria for a specific Expanded Access Protocol may be found by clicking the corresponding link provided in the table below in the column *ClinicalTrial.gov identifier*.

For non-U.S. Health Care Providers:

For additional information can be obtained through your local Pfizer Medical Director accessible through your country [Medical Information](#) office.
